Strawberries								
Sweet Potatoes								
Swiss Chard								
Tomatoes								
Tomatillos								
Turnip								
Watermelon								
Winter Squash								
Zucchini								

One of the Market volunteers conducted a survey most Saturdays to catalog the fresh fruits and vegetables that were sold. Produce that had been stored from the previous year was not counted as current production. Some produce is grown locally in hot houses and was counted. This chart displays the results of the survey. Blue indicates the produce was being sold at the Market.
